

# Energy Advisors at Your Service

Achieve ongoing energy efficiency goals with personalized guidance at no cost

Take advantage of our full team of engineering experts plus outreach support to overcome any obstacles and reach your energy savings goals.

In addition, you'll have access to the Energy Solutions for Business Program, which offers incentives and services for commercial and industrial customers who implement cost-saving improvements.

## Support at Every Step

Whichever aspect of the program you're participating in, energy advisors are available to:

Determine eligibility, answer your questions and assist with application

Explain benefits and incentives

Perform benchmarking and evaluation

Offer personalized solutions and technical support

Manage your pipeline of projects

## Energy Advisor Services Include:

Energy Advisor Services help you leverage our expertise to optimize all opportunities for savings.

- Facility benchmarking and baseline measurement
- Energy master planning sessions
- Facility review and assessments
- Project development resources
- Research for incentives, funding sources and finance options
- Project calculations
- Project design and technical support
- Support for internal project advocacy
- Contractor research and introductions
- Ongoing monthly energy usage reviews
- Strategic energy management (SEM) cohort participation
- Sustainability and carbon reduction support and reporting

EmPOWER Maryland programs are funded by a charge on your energy bill. EmPOWER programs can help you reduce your energy consumption and save you money. To learn more about EmPOWER and how you can participate, go to [energy.maryland.gov/Pages/Facts/empower.aspx](http://energy.maryland.gov/Pages/Facts/empower.aspx).

By participating in energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights, which refers to the demand reduction associated with any energy efficiency or peak demand reduction measures for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs.
