

Instant Lighting Maintenance Discounts

Save on LED lighting solutions that reduce energy and maintenance costs.

Are you responsible for lighting maintenance across facilities? By upgrading to energy-efficient LEDs, you can receive Instant Discounts and reduce your energy and maintenance costs. Potomac Edison will work with you to proactively set up a customer account number list with participating distributors to quickly verify your staff at the time of each purchase.

No paperwork, no wait. Instant Lighting Discounts make it easy for your facilities and maintenance staff to save on qualified lighting products at participating distributors. Discounts are available for linear LED and LED lamp technologies replacing linear fluorescent, incandescent, high-intensity discharge or other inefficient lighting.

How to Participate

1. Survey your facilities to determine the condition of each lighting system and record which ones require maintenance. Consider standardizing lamp types for consistent output and to reduce inventory.
2. Contact the Instant Lighting Discounts team to set up a customer account number list with a participating distributor for all of your locations. If you have a favorite distributor who isn't participating, the program team is happy to reach out to them to determine eligibility.
3. Have your staff select qualified lamps at the participating distributor. The distributor will have your account numbers on file, and the Instant Discount will be applied at the time of purchase.

You can then return to your distributor and continue receiving Instant Discounts until all of your lighting has been upgraded to energy-efficient LEDs.

Benefits to Your Business

LED Instant Discounts with no paperwork required

Personal assistance from the program team

Less maintenance and lower operating costs

Instant Discounts on LED Lighting

EmPOWER Maryland programs are funded by a charge on your energy bill. EmPOWER programs can help you reduce your energy consumption and save you money. Go to energysaveMD.com to learn more about EmPOWER and how you can participate.

By participating in energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights, which refers to the demand reduction associated with any energy efficiency or peak demand reduction measures for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs.
