

Take Advantage of Limited-Time Incentives Before They're Gone

Get More Money Back on the Upgrades You Need

Potomac Edison's Energy Solutions for Business Program is offering increased incentives now through Nov. 26, 2025 — or until funds are fully committed. That means lower costs, flexible financing and expert support to help your business complete energy efficiency upgrades with less out-of-pocket expense.

Increased Incentives for Customers of All Sizes

Enhanced benefits include:

- Custom incentive rates increased from \$0.28 to \$0.38 per kWh saved
- 2x the standard incentive amount available for lighting upgrades
- Small business incentives increased; now save up to 80% of installed project costs

Projects must be pre-approved by Nov. 26, 2025, to be eligible for the limited-time offer.

Financing Now Available

Potomac Edison's Energy Solutions for Business Program has partnered with Optimus to offer low-interest financing that works alongside your incentives, so you can start your project now and pay over time:

- Loan amounts from \$2,500 to \$250,000
- Interest rates between 0% and 2.99%
- Incentives are paid once your project is complete

Realize Your Savings Potential

Benchmarking is the first step toward long-term savings and can help you better understand your energy use. Find hidden energy waste that may be costing you money and discover how you stack up to similar buildings with a personalized ENERGY STAR® score. When you schedule a no-additional-cost on-site assessment, you'll also receive a clear report with improvement ideas and savings opportunities.

Act Now! These Incentives End Nov. 26, 2025
